Motivated third-year Computer Science student at the Hebrew University, with hands-on experience in software development, leadership in tech education, and a strong foundation in algorithms and systems. Passionate about using technology to solve real-world problems.

EDUCATION

- Bachelor's Degree in Computer Science – Third-Year Student, The Hebrew University of Jerusalem.
 - Expected to graduate in 2027.
-

MILITARY EXPERIENCE

Commander & Observer (Israel Defense Forces, 2019–2021)

- Served as an observer and commander in multiple control rooms along the Gaza border.
 - Managed soldiers and handled operational incidents in real-time
 - Specialized in intelligence gathering and decision-making under pressure
-

TECHNICAL SKILLS

Programming languages:

- C, C++
- Python
- Java
- SQL

Core Computer Science Concepts:

- Algorithms (Grade: 93)
 - Git
 - Object Oriented Programming
 - Operating Systems
 - Linux Systems
 - Machine Learning
-

PERSONAL SKILLS

- Languages:

Hebrew – Native

English – Fluent

- Fast learner with a self-directed learning approach.
 - Excellent interpersonal skills and ability to work effectively in teams.
-

VOLUNTEERING AND PROJECTS

- **HUJI 100 Years Hackathon (2025)**– Build an AI-powered Android medical simulator app. Used Python, Android Studio, and ML models for diagnosis simulation.
- **Py.terit Instructor & Project Lead (2025)**– Taught basic Python to a group of 10 women from domestic violence backgrounds, empowering them with coding skills.
- **Instructor at Queen B (2025– 2026)**– a organization that promotes computer science education among young women. I teach high school girls and prepare them for their computer science matriculation exams.
